Strategy : Long Only Equity

The firm practices a systematic investment style, whereby it uses proprietary models to screen over 6000 active companies worldwide for mostly fundamental investment criteria. The models are based on a company's relative valuation and the relative strength of its earnings momentum versus its peers. A frequently rebalanced selection of a large number of the top percentile stocks according to this ranking mechanism forms the basis of its large long stock portfolios. Additionally, a trend following adaptation methodology that systematically adapts to changing market conditions is applied.
